Editor-In-Chief

Dear Readers and Authors,

I am pleased to bring you Volume 11, Issue 3 of Pharmacognosy Communications. In this issue, we present new research reports

examining the pharmacognosy of several important medicinal plants including the antibacterial activity of the Australian plant species *Heritiera actinophyllum* (F.M.Bailey) Kosterm. leaf extracts, as well as the interactive effects of the South Asian species *Terminalia arjuna* (Roxb.) Wight and Arn. extracts in combination conventional antibiotics against some bacterial triggers of auto-immune inflammatory diseases. We also present a study on the smooth muscle tone modulatory activity of Neem fruit extracts. We also present a mini-review on the therapeutic benefits of *Cirsium vulgare* L. and *Allium ursinum* L.

Our regular features are also continued in this issue. Two more high quality medicinal plant images are also included in this issue and a listing of upcoming conferences and meetings is also included. I encourage any conference organisers who would like to publicise their event to contact me with details so they can be included in future upcoming events sections of this journal. I look forward to bringing you the next issue of Pharmacognosy Communications in 3 months' time. Keep submitting your quality research manuscripts and reviews and also consider becoming involved/submitted to the other sections (Janus Corner, Medicinal Plant Images etc.) of the journal. On behalf of the editorial board, we look forward to bringing you the next issue of Pharmacognosy Communications in 3 months' time.
